

# Construction Advisory

## Sanitary Sewer Rehabilitation

### Glenora Stream Restoration Project

**Project  
Description:**

The Department of Public Works' contractor, *AM-Liner East, Inc.*, will repair sanitary sewers in the vicinity of the Glenora Tributary Stream Restoration project from Saturday, Aug. 23 to Wednesday, Aug. 27.

**Project  
Impact:**

The repairs involve installing a liner along the interior of the sewer pipes to seal cracks and address defects. Excavation is not needed because the liner is installed through existing manholes. *AM-Liner East, Inc.* will access manholes and drive vehicles in the work areas.

Because the sewer pipe will be temporarily out of service, it will be necessary to reroute the sewer flow. The contractor may set up temporary leak-proof hoses and pumps to reroute the flow. You may see these hoses and you may hear the portable pumps. You may notice an odor present while the lining operation is in effect. This smell is created by the curing process and is temporary.

The work is being performed in conjunction with the Glenora Stream Restoration project in order to utilize the same construction access paths. Temporary lane closures and parking restrictions may be necessary on Guy Court, Bouldercrest Court and Great Pines Court.

**Purpose:**

Rehabilitation of damaged sanitary sewer mains.

**Location:**

The Glenora Stream Restoration Project Area (see map on reverse side of this advisory).

**Timeline:**

The repairs are expected to take five days to complete, weather permitting. There is no night work associated with this project.

**Cost:**

\$88,000.
